Scientists have attributed more than 40 percent of the failures in new drug development to poor biopharmaceutical properties, particularly water insolubility. Issues surrounding water insolubility can postpone, or completely derail, important new drug development. Even much-needed reformulation of currently marketed products can be significantly affected by these challenges. Water Insolubility is the Primary Culprit in over 40% of New Drug Development Failures

The most comprehensive resource on the topic, this second edition of Water Insoluble Drug Formulation brings together a distinguished team of experts to provide the scientific background and step-by-step guidance needed to deal with solubility issues in drug development. Twenty-three chapters systematically describe solubility properties and their impact on formulation, from theory to industrial practice. With detailed discussion on how these properties contribute to solubilization and dissolution, the text also features six brand new chapters on water-insoluble drugs, exploring regulatory aspects, pharmacokinetic behavior, early phase formulation strategies, lipid based systems for oral delivery, modified release of insoluble drugs, and scalable manufacturing aspects. The book includes more than 15 water-insoluble drug delivery systems or technologies, illustrated with case studies featuring oral and parenteral applications. Highlighting the most current information and data available, this seminal volume reflects the significant progress that has been made in nearly all aspects of this field.

on oral controlled.

Aulton's Pharmaceutics The Design and Manufacture of Medicines, Michael E. Aulton, Kevin Taylor, 2013, Medical, 894 pages. Pharmaceutics is one of the most diverse subject areas in all of pharmaceutical science. In brief, it is concerned with the scientific and technological aspects of the design.

Optimization of drug delivery proceedings of the Alfred Benzon Symposium 17 held at the premises of the Royal Danish Academy of Sciences and Letters, Copenhagen 31 May-4 June 1981, Hans Bundgaard, Anne Bagger Hansen, Helmer Kofod, 1982, Medical, 434 pages. Among the topics examined in this volume are design of controlled release products, prodrugs as delivery systems, macromolecular drug carriers, and use of liposomes in drug.

Colloidal Drug Delivery Systems, Jorg Kreuter, Jun 14, 1994, Science, 368 pages. This volume provides a single-source of reviews for all the important colloidal drug delivery systems, including nanoparticles, liposomes, niosomes, microemulsions and.

Injectable Dispersed Systems Formulation, Processing, and Performance, Diane J. Burgess, May 23, 2005, Medical, 688 pages. This authoritative guide will serve as the most current source on the design and manufacturing of parenteral dispersed systems-showcasing the utility of dispersed systems in.

Advanced Drug Formulation Design to Optimize Therapeutic Outcomes, Robert O. Williams, David R. Taft, Jason T. McConville, Sep 25, 2007, Medical, 536 pages. This title demonstrates how advanced formulation designs and delivery technologies can be used to improve drug efficacy and treatment outcomes in particular therapeutic.

The Pink Fairy Book, Andrew Lang, 1897, Fairy tales., 360 pages. A collection of forty-one fairy tales from the folklore of Japan, Scandinavia, Sicily, Africa, and Spain

Conquistadors of the Useless From the Alps to Annapurna, Lionel Terray, Jan 1, 2001, Sports & Recreation, 370 pages. An engagingly written portrait of the times and climbs of premier French Mountainerer, Lionel Terray including the Eigerwand, Fitzroy, Annapurna and more
India After Gandhi The History of the World's Largest Democracy, Ramachandra Guha, 2008, India, 300 pages. Told in lucid and beautiful prose, the story of India's wild ride since independence is a riveting one. Guha explores the dramatic protests and conflicts that have shaped modern Weed control in turf and ornamentals, Alfred J. Turgeon, Lambert Blanchard McCarty, Nick Edward Christians, 2009, Gardening, 300 pages. Pearson AG is Going Green Issues of sustainability and preserving our natural resources, consistently rank among the most important concerns to our customers. To help do our
